Informatics Engineer 03/2018.
Private University Dr. Rafael Bellosó Chacín.

Certifications

Adrian Flores

Credential		Earned Date
	Salesforce Certified Platform Developer I	April 28, 2021
	Salesforce Certified Administrator	June 1, 2020

Professional Experience

Salesforce Developer - Administrator 08/2021 – Current

Forte Group
United States (remote).

Main duties:

Apex development, custom integrations, Lightning Web Components, platform management. Automation development using declarative and non-declarative tools.

Achievements:

Adrian built payment gateway integrations between Salesforce and Stripe, Authorize.Net and Net Suite using Custom Settings and LWC for a Checkout Flow used in a Web Checkout process in the Salesforce Commerce Cloud B2B storefront. Set up Salesforce Commerce Cloud (product catalog, storefront site, registration form). Adrian also has participated in a Salesforce Bootcamp as a content curator, trainer, and mentor.

Salesforce Developer - Administrator 03/2019 – 11/2021

ImagineCRM
United States (remote).

Main duties:

Apex development, custom integrations, Lightning Web Components, platform management. Automation development using declarative and non-declarative tools.

Achievements:

Adrian created a data synchronization system between a SQL Server and Salesforce using SSIS (SQL Server Integration Services), exposing Integration Services through a Web Service made in C#, consumed by Salesforce on-demand. Develop multiple screen flow components to take full advantage of flows and segments to fulfill specific tasks for each client, improve the UX and add scalability to flows, develop registration pages and expose through Communities and Sites. Development in Salesforce DX and Visual Studio Code.

Salesforce Developer. 09/2018 – 02/2019

SertPro360 S.R.L.
Peru (local).

Main duties:

Adrian's primary duties implied the development of Triggers and classes development, configuration and customizations, automation, reports, dashboards, data import, and varied integrations.

Achievements:

Adrian built an integration between SUMO Scheduler for Salesforce and Twilio SMS messages. I have made many automation processes using triggers, batches, workflows, validation rules, and configurations. Successfully ran mass data import in an active Org without affecting the client's work process. I have refactored code in VFP, controllers, Test classes, and Mapping inactive integrations (Shopify, NetSuite). Salesforce's Communities Creation, configuration, and administration.
